

Bears Bears, Bears

Baby bears are called "cubs".

They are born in winter while their mother sleeps or hibernates in their den or home.

The mother bear takes care of her baby cubs.
They need food, water and shelter to live.

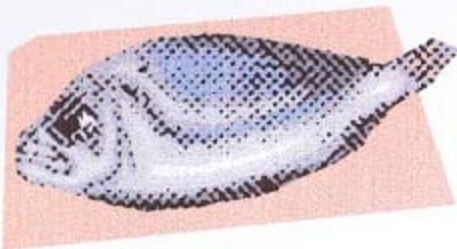

Bears eat bark

berries

fish

, honey

and

small animals such as

,and

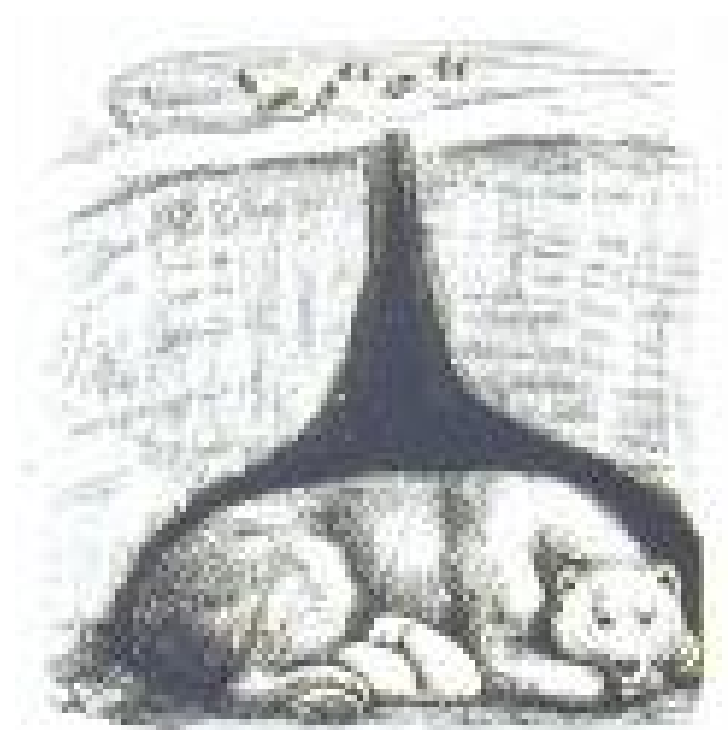

baby deer.

A bear home is called a den.
It can be a cave or a hollow
log.

Or under the ground.

Bears like to climb trees.

They also like to swim and play in the water.

Bears that live in the forest can be different colors. They can be **brown** or black.

Bears can be dangerous to people!
