

Language Acquisition!

A child must experience language to learn it.

Respond to all communication efforts such as: pointing, gesturing, and approximations of words!

Relax! Have fun with your child. Be spontaneous!

TALK! TALK! TALK!

Listen to your child! Take time for your child to communicate.

Give your child your undivided attention for at least a short period of time every day. Take advantage of the time you have with your child.

Sing! This is fun!

Accept silence sometimes. Momentary silence is a natural part of communication!

"This is my piece of gum!"

"NO! MINE !!"

"I will share with you."
