

Octopus Fact Story

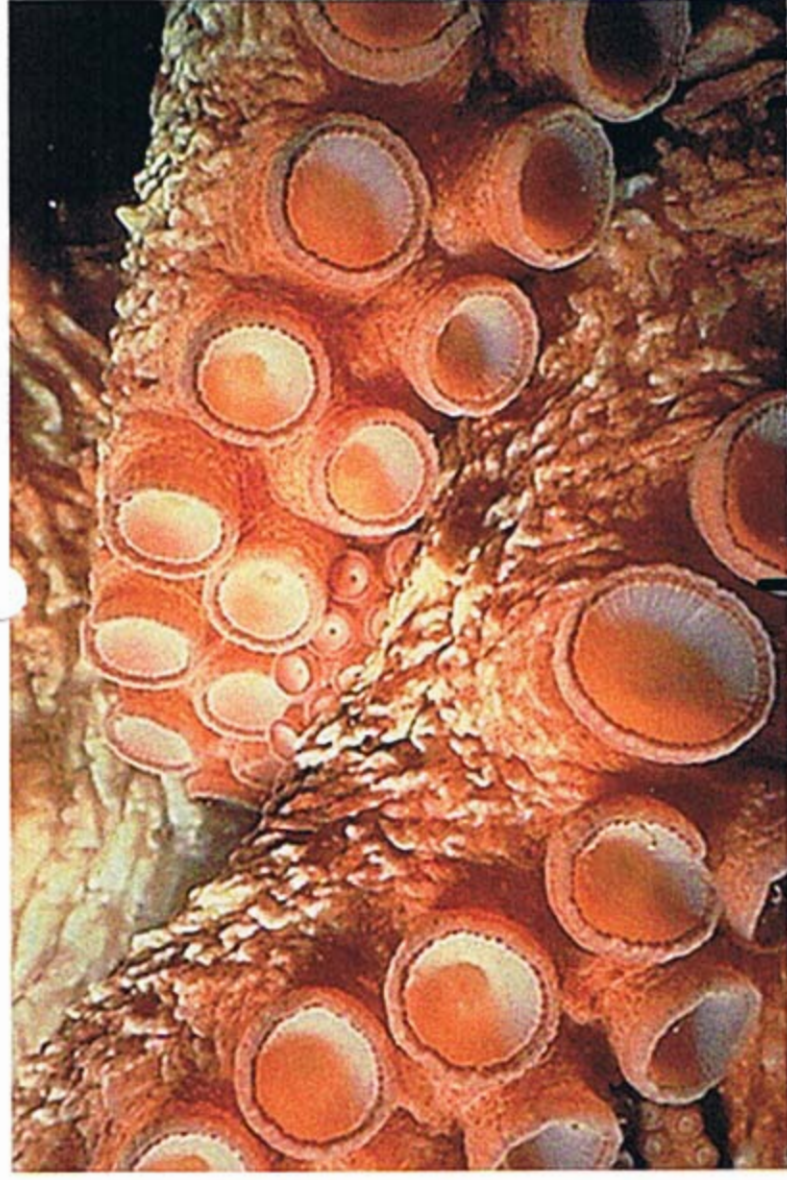

An octopus has 8 arms.

If it loses 1, another will grow back.

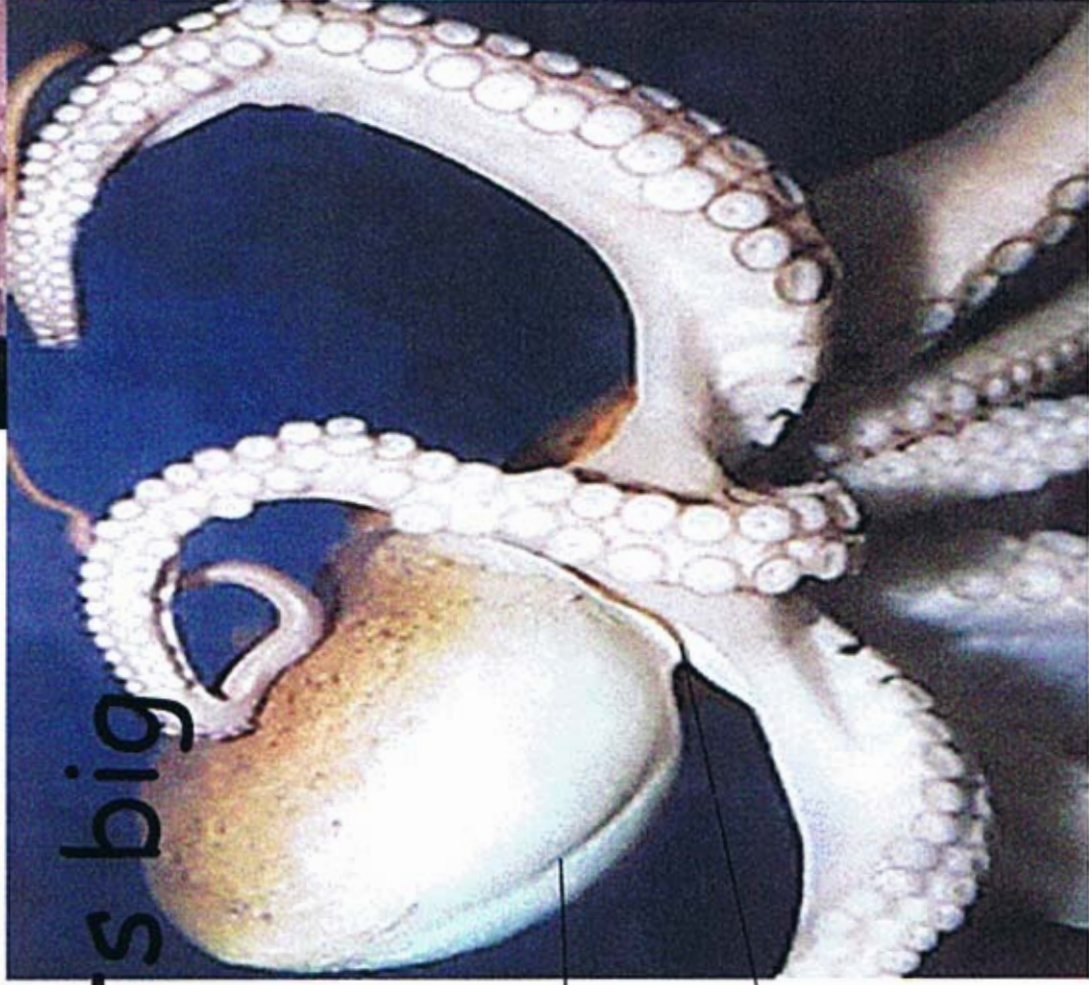

These are suckers on the bottom of an octopus' arms. They help the octopus move.

An octopus' mouth
is under its big
head.

Head

Mouth

Secret weapon:
"Poison" so
what it wants
to eat can no

longer move

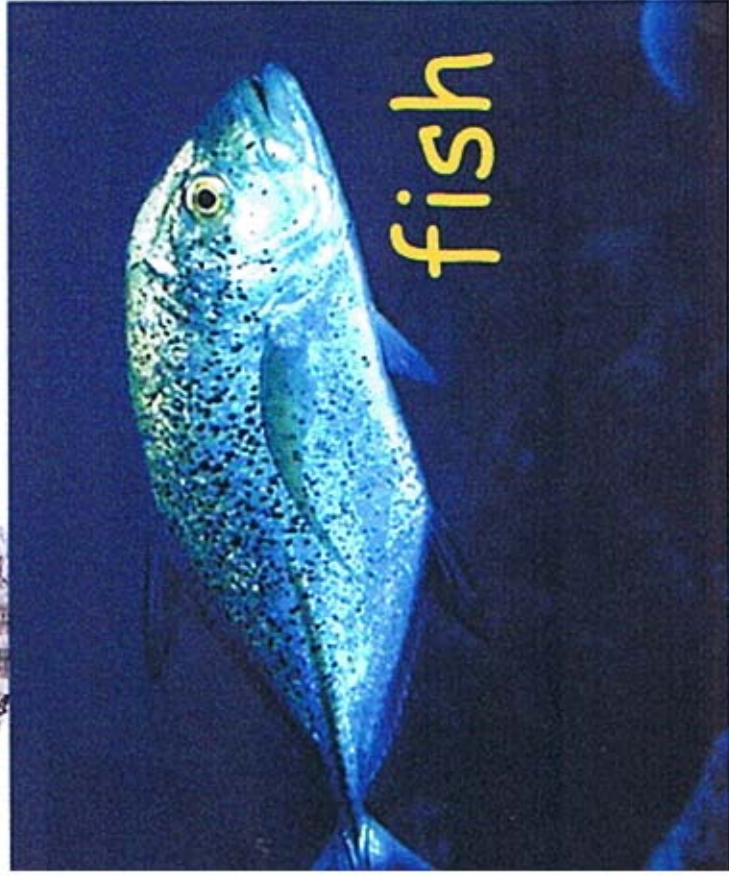

Eat :

crabs

scallops

fish

While cephalopods have a soft body, the nautilus has a hard, outside shell often found on beaches. credit: CSIRO
