

Our Weather Book!

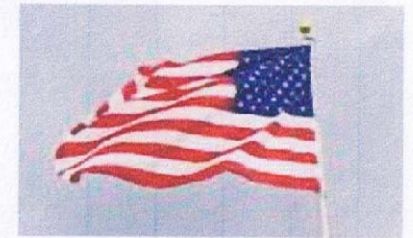

Wind is **moving air!**

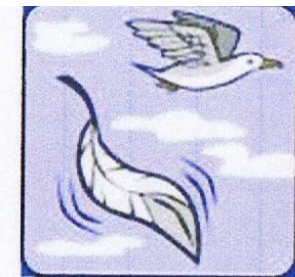

Wind is invisible! We can't see it. Air is all around us.
We see what wind moves:

Wind can sound loud

or soft

snow

When it is very cold

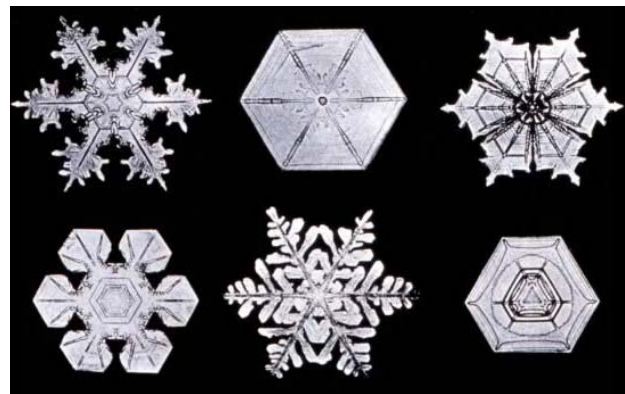

,water in the clouds come down as snowflakes.

white.

Snow is the color

Each snowflake is different. No two snowflakes look exactly alike.

It is fun to play in the snow.

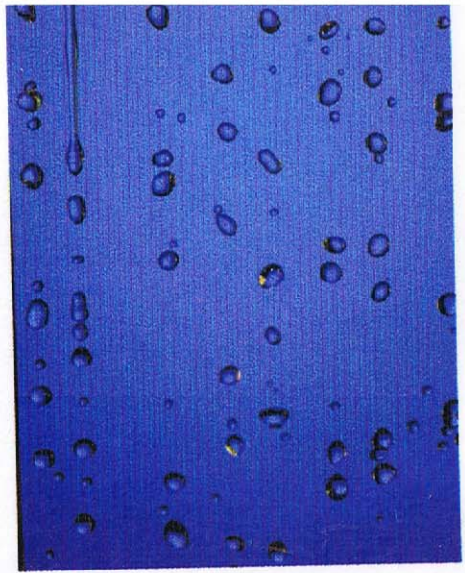

The  can cause the snow to melt.

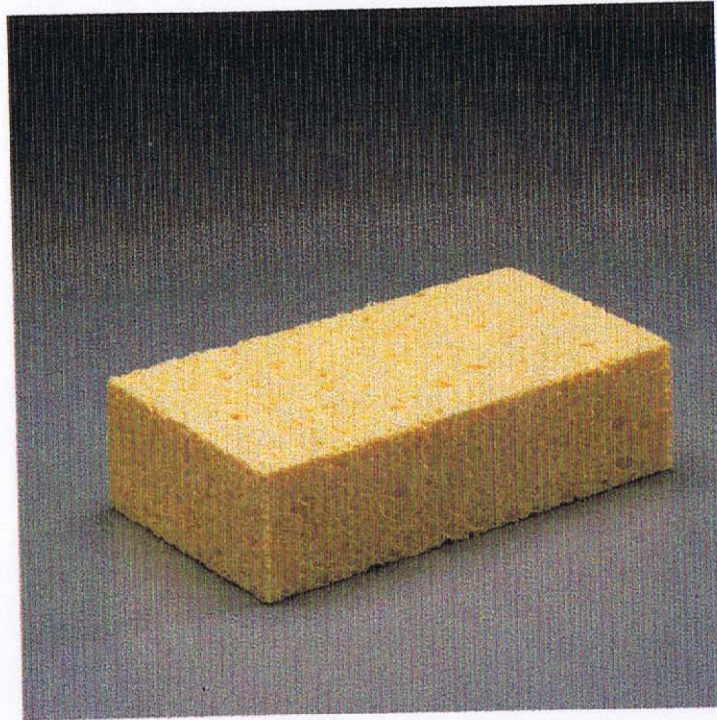

rainy

Water is always in the air.

The air is like a

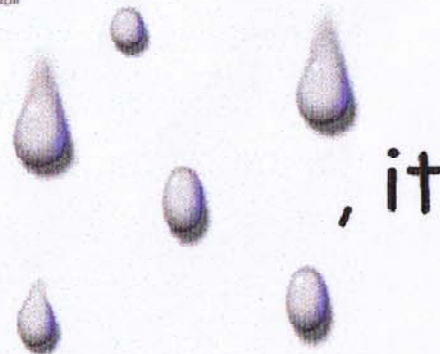

1

When there is lots of water- it forms a cloud.

When the cloud can't hold anymore

(c)mbit

, it

helps things grow.
